Address: 12708 Road 5 Bernardo Village Mayondon Los Baños, Laguna, 4030, Los Baños, Philippines (Home)

ABOUT ME

I am a **Bachelor of Science in Computer Science graduate** from **Laguna State Polytechnic University – Los Baños Campus**, with hands-on experience in **software development, web development, machine learning, and IT technical support**. I have developed and implemented various machine learning models, created a mobile inventory application, and built a simple backend for an e-commerce platform. I am passionate about leveraging technology to solve real-world problems and am eager to contribute to innovative and impactful projects.

PROJECTS

03/02/2025 – 16/05/2025

Assistance & Support Services for Information System Technologies

We developed the **DOST Calabarzon ASSIST** (Assistance & Support Services for Information System Technologies) website.

My main responsibility was backend development using Laravel 11, with some contributions to the frontend using TypeScript.

10/2025 – 10/2025

Simple Static E Commerce Web App - Flutter

A full-featured **Flutter-based food ordering mobile app** that simulates a food marketplace where users can browse food items, search products, manage a shopping cart, and place orders. The app implements key e-commerce app patterns using mobile UI screens, in-memory state management, and built-in navigation.

05/2025 – CURRENT

JK Stall Mobile Inventory System

JK Inventory System is a mobile inventory management app built with **Flutter**. It lets users create and manage categories and products, add stock batches, track daily product outings (sales, returns, discards), and view an activity log of all major inventory actions. All data is stored locally on the device using Hive, making it fast and usable offline. The app is designed primarily for Android and iOS, with future plans for cloud sync and multi-device support.

20/02/2026 – 22/02/2026

Reward Token

Reward Token App — Flutter & Firebase Loyalty System

Developed a mobile loyalty application using Flutter and Firebase for customer registration, QR-based identification, and points management. Implemented secure employee authentication with PIN login, role-based access control, and real-time Firestore synchronization. Built QR scanning, PDF generation, and image export for digital customer cards. Integrated Hive for local persistence and designed a custom dark-themed UI using Material 3.

Technologies: Flutter, Firebase Auth, Cloud Firestore, Hive, QR Scanner, PDF/Printing, Material 3

Bike Rides Tracker

A **BIKE TRACKING** app with **GPS ride recording, live stats, ride history, route replay maps, offline map caching, background tracking notifications, and customizable themes.** Built with Flutter, Hive, Provider, Geolocator, and OpenStreetMap.

EDUCATION AND TRAINING

08/2015 – 11/2015 Calamba, Laguna, Philippines

COMPUTER HARDWARE SERVICE TRAINING Colegio de San Juan Letran

2018 – 2022 Los Baños, Laguna

INFORMATION, COMMUNICATION AND TECHNOLOGY Laguna State Polytechnic University - Los Baños Campus

2020

NETWORK ETHICAL HACKING FOR BEGINNERS

2022

COMPLETE C# UNITY GAME DEVELOPER 3D

2023 Philippines

CERTIFICATION OF APPRECIATIONS Office of the Student Affairs and Services Supreme Student Council

03/02/2025 – 16/05/2025 Los Baños, Philippines

CERTIFICATE OF COMPLETION | ON THE JOB TRAINING Department of Science and Technology
CALABARZON

08/2021 – 24/06/2025 Philippines

BACHELOR OF SCIENCE IN COMPUTER SCIENCE MAJOR IN INTELLIGENT SYSTEMS Laguna State Polytechnic University

LANGUAGE SKILLS

Mother tongue(s): **TAGALOG**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	B2	C2	C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

EXPERIENCE

06/2021 – 06/2022

Executive Secretary | College of Computer Studies Student Council

- Drafted and prepared official organizational letters and formal documents for submission to the College Dean and administrative offices.
- Ensured accuracy, professionalism, and proper formatting of all communications.
- Assisted in administrative coordination and documentation for council activities and events.

08/2021 - 11/2024

Vice President | Legion of Lures Esports Organization

- Helped grow and manage the university's esports community through organized events and recruitment initiatives.
- Planned, coordinated, and executed esports tournaments and organizational events.
- Led the Creatives Team in producing promotional posters, digital graphics, and video content.

- Oversaw branding, marketing materials, and visual assets to improve organizational visibility and engagement.
- Supported leadership decisions, operations, and strategic planning.

Unity / Godot 2D Game Developer

- Developed 2D games using Unity and Godot game engines.
- Implemented gameplay mechanics, UI systems, and game logic using C# and GDScript.
- Designed and tested game features including player movement, physics, and interactions.
- Worked with sprites, animations, and scene management to create functional game environments.

Freelance Software and Web Developer

- Developed custom software applications and websites using multiple programming languages.
- Built web applications using HTML, PHP, and backend logic.
- Created desktop and system applications using C#, Java, Python, and C++.
- Designed scalable, maintainable code and implemented core application features.
- Assisted clients with software solutions, debugging, and feature implementation.

Flutter Mobile App Developer

- Developed cross-platform mobile applications using Flutter and Dart.
- Built responsive user interfaces and implemented app navigation and state management.
- Integrated application logic, data models, and user interaction features.
- Created scalable and maintainable mobile app architectures.

08/10/2025 – CURRENT

Programmer and System Administrator

- Develop and maintain internal web applications to support company operations and improve workflow efficiency.
- Design and implement application features, backend logic, and user interfaces using modern development tools and programming languages.
- Provide technical support and troubleshooting for employee devices, resolving hardware, software, and network issues.
- Install, configure, and maintain company systems, software, and user environments.
- Manage podcast recording sessions, including technical setup, audio equipment configuration, and file handling.
- Ensure system reliability, performance, and smooth daily IT operations.

● ORGANISATIONAL SKILLS

Application and Software Proficiency

Proficient in multiple programming languages including Python, PHP, C#, Java, C++, C, and HTML. Experienced in developing software applications, implementing backend logic, and building responsive user interfaces using modern development tools and frameworks.

Problem Solving Skills

Strong analytical and critical thinking skills with the ability to identify issues, debug software, and implement efficient and scalable solutions. Experienced in troubleshooting code, optimizing performance, and resolving technical challenges.

Leadership and Team Collaboration

Demonstrated leadership experience through academic and organizational roles, including managing teams, coordinating projects, and overseeing creative and technical tasks. Effective in team collaboration, task delegation, and achieving project goals.

Adaptability and Continuous Learning

Quick learner with the ability to adapt to new technologies, frameworks, and development environments. Continuously improving technical skills and staying updated with modern software development practices.

AI-Assisted Development and Productivity

Proficient in using Large Language Models (LLMs) such as ChatGPT, Anthropic Claude, and similar AI tools to improve development efficiency. Experienced in leveraging LLMs for code generation, debugging, documentation, problem-solving, and accelerating software development workflows.
